SHORT TIMESCALES

TRAFFIC MANAGEMENT

OVERNIGHT WORKS / OUT-OF-HOURS

550 METRES OF HOARDING

CASE STUDY

Client : Portsmouth City Council

Sector : Local Authority / Construction

Portsmouth City Council have a vision to develop a vibrant city centre that is the beating heart of their great waterfront city.

The regeneration programme will deliver welcoming gateways, beautiful streets, lively & distinctive spaces and delightful buildings, whilst enhancing the city's heritage assets.

The Council worked with PFI Sign Solutions to install just under half a mile of digitally printed hoardings around the Hope Street regeneration construction site, telling the story of their city centre projects and plans.

PFI GB Signs worked collaboratively with the Council and Contractors in the preparation of the site, traffic management, sharing compounds and co-ordinating works.

The works were undertaken out-of-hours to minimise disruption. The works were completed in 6 nights.

Issues identified on-site including height variations and uneven ground issues, were resolved onsite without impacting delivery.
